

Worm Composting Workshop

Saturday, December 9

10:00 am – Noon

Earthworms can “recycle” your fruit and vegetable scraps into extremely rich compost called “worm casts.” Using a specialized variety of worms and a simple “worm box” you can do your part to reduce waste and at the same time make compost. Whether you live in a house with a yard or live in an apartment, condominium or townhouse you can use a worm box to “recycle” your fruit and vegetable scraps. Join us for this very popular and **FREE** two-hour workshop by contacting Contra Costa County at **925-674-7831**. Space is limited, so register today!
